### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Peko.

Peko shows a plastic cup (22) with lid (23) that is *capable* of receiving and holding animal urine and a cup holder (16) for slidably receiving the cup therein. The holder includes flanges (20,36,38) that cooperate with flanges (72) on the cup to hold the cup in an upright position.

3. Claims 1, 2, 4, 5, 7-10, 12-14, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones et al..

The patent to Jones et al. shows an embodiment of a specimen cup (144) with lid (151) and a holder (140) having a center extension (170,178,180), a ring-shaped cup holder portion (152), and a handle portion (182).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dooley, Jr. et al. in view of Jones et al..

The Dooley, Jr. et al. patent shows a device for the collection of an animal urine specimen in Figure 7 that contains all of the limitations set forth in claims 1 and 18 except that it does not specifically disclose its cup (110) and lid (112) as being "plastic".

However, the Jones et al. patent shows it old and well known to use a plastic cup assembly (see col. 3, line 48) to collect a urine specimen.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the cup (110) and lid (112) of the Dooley, Jr. et al. device out of plastic as taught by Jones et al. to create a durable yet inexpensive cup assembly.

***Allowable Subject Matter***

6. Claims 6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 15-17 are allowed.

***Specification***

8. The disclosure is objected to because of the following informalities: On page 16, line 12, it appears that the word "that" should be changed to -than—and on page 19, line 18, the term "movelemt" should be changed to -movement--.

Appropriate correction is required.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Estay shows a device for collecting a urine specimen.
